MARSEILLES, September 12.—The Duke of the Abruzzi was given an impressive reception on his arrival here this morning aboard the steamer Oceania. An immense crowd had gathered at the wharf to greet the distinguished explorer.

The Italian consul-general, Count Di Savoia, and the members of the Marseilles Geographical Society and representatives of the municipal authorities went aboard the steamer to greet the duke, who first received Count Di Savoia alone. From him he obtained a large package of mail, and he retired to read the letters. When he reappeared his face was radiant. The duke said that he was delighted with his trip, and added:

"I am sorry that I was not able to complete all that I had planned, but the results nevertheless were satisfactory. I hold the record for the highest ascension in the Himalayas, the previous record being held by a Norvesian, who crossed Mount Kabru at a height of 1,300 metres (23,900 feet).

My expedition reached the cop of Bright Pic, in the Godwin-Austen

weginn, who crossed about Rabit at a height of 7,300 metres (23,900 feet). My expedition reached the top of Bright Pic, in the Godwin-Austen range, at a height of 7,500 metres (24,890 feet). I bring back reports which I believe will prove interesting in my forthcoming book."

The duke later received the correspondents, who asked him about the reported discovery of the pole by Cook and Peary. He replied:

"I am without precise information regarding this double polar expedition, and I therefore can give no opinion."

He quickly checked the attempts of several American correspondents to ascertain whether he intended to go to Paris, where Miss Katherine Elkins was known to be. The duke went ashore to a hotel with his aide, the Marquis Di Negroto. He lunched with Count Di Savoia.

IRISHMEN GOING HOME

Thousands in This Country Will Pay Visit to Emerald Isle.

WASHINGTON, D. C., September 12.—
Representing a total membership of 206,000 in all parts of the world, the national board of the Ancient Order of Hibernians has unanimously indorsed the homegoing to Ireland, 1910, originated by Francis J. Kilkenny, of this city, rind the national board has urged the members of the order to avail themselves of the opportunity afforded them to visit the Emerald Isle.

"I was glad to learn of the cordial approval of the homegoing pligrimage, if the homegoing pligrimage, if the Ancient Order of Hibernians," said Mr. Kilkenny to-day. It will give the movement prestige and influence. With the co-operation of the Ancient Order of Hibernians, and the thousands of energetic and wealthy Americans who compose it, the success of the movement is doubly assured. We have been daily growing in strength, and already thousands have signified their intention of visiting Ireland in 1910.

"The co-operation of other Irish organizations is welcomed. The visit of the pilgrims will mark a most important event in Irish history. There is nothing of a political character in this movement. The trip is being organized solely upon the lines of the homecoming weeks in many of our cities and States."

FARMER'S LUCKY FIND

mantelpiece in his home.

The approach of cool weather caused him to try to utilize a freplace unused since he bought the place two years ago from Lafayette Burnett, an eccentric man, who died recently. While making a larger vent in the chimney he came across an old tin box, and, on opening it, found several packages of bills in large denominations.

On counting the money it was said the total was \$8,000. It is known that Burnett, the former owner, had no faith in banks. Since the discovery of the money Malloney has disappeared and cannot be located. Neighbors are of the opinion that other valuable finds remain to be made about the premises.

Physicians Doing Notable Work Against
Country's Scourses.

WASHINGTON, D. C., September 12.—
Greek physicians are doing conspicuous work in combating their country's two chief scourges—maiarial fever and tuberculosis—according to Consul-General George Horton, reporting from Athens. Malarial fever claims on an average 2,000 persons each year, he says, while in the epidemic years, due to excessive rains, the number exceeds 4,000, which was the case in 1905.

Through lectures and other sources the people have become interested in fighting the malarial-carrying mosquito by draining stagnant ponds or covering them with petroleum.

In Athens next year a tuberculosis congress is to be held, to which not only physicians will be invited, but also the mayors and other prominent people of Greece.
